PCI-1215

VIA Eden™ Low Power Half-size CPU Card With VGA/LAN

PCI-1215 is a new embedded computing platform for low power, fanless applications based on industrial standard form factor of Half-size PCI CPU card equipped with VIA Eden™ LP CPU at speed of 400/733MHz. The fanless VIA Eden™ processor is a low power, high performance, and highly integrated x86 platform providing the most flexible, compatible, and cost-effective solution for new generation of connected digital information & entertainment devices.

The chipset, VT8606, provides VGA function up to 32 MB shared memory and simultaneously supports for CRT, and TTL display. The PCI-1215 is also built with Realtek 8100BL to support 10/100 Base TX fast Ethernet and Wake-on-LAN function. It has one 144-pin SO-DIMM socket supporting up to 512MB DRAM. Other than these, PCI-1215 also has one enhanced EIDE (UDMA33/66/100), one FDD interface, two serials, one parallel, one IrDA, and two USB ports.

The PCI-1215 also supports PC/104 and designed to meet the needs of applications that require extraordinary computing performance and reliability. It can run Windows 95/98/2000/XP, Linux 7.3 as well as embedded real-time applications. As a result, it is the ultimate solution for telecommunications, Internet, industry automation, and network computing applications.
