Product Overview

NEXCOM is proud to announce that the enhanced PEAK 760VL2 SBC is now capable to support the Intel® Pentium® 4/Celeron® D (Cedar Mill/Prescott) processor with 533/800 MHz FSB up to 3.6 GHz. The Intel® Pentium® 4 Cedar Mill processor is built-in with Intel's leading 65-nanometer silicon process technology and consumes only 95 watts of TDP; therefore, the PEAK 760VL2 is able to implement the industrial computing platform effectively and efficiently.

The design-in platform, PEAK 760VL2 SBC also follows the PICMG 1.0 standard and features the Intel® 915GV and ICH6 chipset, which integrated with two PCI Express Gigabit LAN, built-in four SATA, and six USB 2.0 ports. In addition, NEXCOM's backplanes are compatible to the PEAK 760VL2 SBC, which makes the industrial grade PEAK 760VL2 SBC an ideal solution for advanced mainframe, high-end industrial based controller, storage equipment, and commercial printer applications.
