- CPU temperature control and alarm function
- DiskOnChip® 2000 socket for Flash disk of up to 72 MB
- PCI SVGA interface with high performance S3® Trio64V2/DX chipset and 2 MB memory
- PCI Enhanced IDE with high speed Multi I/O support
- 512 KB pipeline burst cache
- Watchdog Timer

The PIA-652 is a full-size PCI/ISA Pentium single board computer based upon INTEL's 82437 VX PCIset. It includes an onboard SVGA CRT interface and a DiskOnChip®2000 socket for Flash Disks up to 72 MB. The PIA-652 includes special circuitry to stabilize CPU temperature and send an audible alarm when the CPU overheats.

PCI EIDE, HIGH SPEED MULTI I/O

The PIA-652's PCI Enhanced IDE interface supports ATA PIO mode 3 and mode 4 devices enabling data transfer rates in excess of 11 MB/sec. Up to 4 IDE devices can be connected, including hard disks, CD-ROM drives, tape backup drives and other IDE devices.

Also supported are two high-speed serial ports (2 x RS-232) with 16C550 UARTs and 16-Byte FIFO's, an enhanced bi-directional parallel port supporting SPP/ECP/EPP mode, a floppy controller and onboard support for USB and IrDA.

CRT SVGA CONTROLLER

The CRT SVGA controller is based on S3's latest Trio64 V2/DX chipset and comes standard with 2 MB memory. It is your guarantee for high speed and excellent compatibility with all popular operating systems.

DISKONCHIP®2000

The PIA-652's SSD socket accommodates a DiskOnChip®2000, a new generation of high performance single-chip Flash Disks. This unique data storage solution offers a better, faster and more cost-effective Flash Disk for applications with limited space and modest disk capacity requirements.

WATCHDOG TIMER

The onboard Watchdog Timer can invoke an interrupt or reset the CPU when your application loses control over the system.
