

WD VelociRaptor®

SATA Hard Drives

WD VelociRaptor hard drives deliver maximum speed and reliability for blade servers, workstations, and low-end servers. With a superbly engineered combination of 10,000 RPM spin speed, SATA 6 Gb/s interface and a 32 MB cache, these drives are truly an evolution in performance.

INTERFACE

SATA 6 Gb/s (BLHX models) SATA 3 Gb/s (BLFS models)

MODEL NUMBERS

WD6000BLHX WD3000BLFS WD4500BLHX WD1500BLFS

WIDTH/HEIGHT

2.5-inch/0.6-inch

ROTATIONAL SPEED

10,000 RPM

JAPACITIES

150, 300, 450, and 600 GB

Note: Not all products may be available in all regions of the world.

Product Benefits

Killer speed

With up to SATA 6 Gb/s interface and 32 MB cache, next generation 10,000 RPM WD VelociRaptor are up to 15% faster than the award-winning previous generation.

Rock-solid reliability

Designed and manufactured to missioncritical enterprise-class standards to provide enterprise reliability in high duty cycle environments. With 1.4 million hours MTBF, these drives have the highest available reliability rating on a high-capacity SATA drive.

Monstrous capacity

WD VelociRaptor SATA drives are available in capacities up to 600 GB, double the capacity of the previous generation.

Ultra-cool operation

Consumes no more power than the previous generation WD VelociRaptor while offering double the capacity and higher performance.

Rotary Acceleration Feed Forward (RAFF™)

Optimizes operation and performance when the drives are used in vibration-prone, multi-drive chassis.

NoTouch™ ramp load technology

The recording head never touches the disk media ensuring significantly less wear to the recording head and media as well as better drive protection in transit.

Environmentally conscious

In addition to being ROHS compliant, this generation of WD VelociRaptor is also a halogen free design.

5-year limited warranty

Applications

Blade servers, workstations, and low-end servers.

¹ As used for storage capacity, one megabyte (MB) = one million bytes, one gigabyte (GB) = one billion bytes, and one terabyte (TB) = one trillion bytes. Total accessible capacity varies depending on operating environment. As used for buffer or cache, one megabyte (MB) = 1,048,576 bytes. As used for transfer rate or interface, megabyte per second (MB/s) = one million bytes per second, and gigabit per second (Gb/s) = one billion bits per second. Effective maximum SATA 3 Gb/s transfer rate calculated according to the Serial ATA specification published by the SATA-10 organization as of the date of this specification sheet. Visit www.sata-io.org for details.

WD hard drive products manufactured and sold worldwide after June 1, 2006, meet or exceed Restriction of Hazardous Substances (RoHS) compliance requirements as mandated by the European Union for electrical and electronic products. The RoHS Directive 2002/95/EC of the European Parliament, which is effective in the EU beginning July 1, 2006, aims to protect human health and the environment by restricting the use of certain hazardous substances in new equipment, and consists of restrictions on lead, mercury, cadmium, and other substances.

3 Controlled unload at ambient condition

⁴The term of the limited warranty may vary by region. Visit support.wdc.com/warranty for details.

⁵No non-recoverable errors during operating tests or after non-operating tests.
