

# **NEWT**

## **EPIC Single Board Computer**

- DMP Vortex86DX processor
- Soldered-on RAM (up to 1 GB)
- Full industrial temperature operation
- Fanless operation
- MIL-STD-202G shock/vibe
- Fast Ethernet (1 or 2 ports)

- Analog and Digital I/O
- USB 2.0 (up to 4 ports)
- Serial I/O (4 ports)
- IDE interface
- Flash storage
- SPX<sup>™</sup> I/O expansion

## **Highlights**

#### **EPIC Form Factor**

Industry-standard format with PC/104-Plus expansion.

#### DMP Vortex86DX Processor

800 MHz performance. Very low power consumption.

#### **Network**

Single or dual Ethernet with remote boot support. Optional latching connectors.

#### Analog + Digital I/O

On-board data acquisition. Up to 16 analog inputs, 8 analog outputs, and 32 digital I/O lines.

#### RAM

Up to 1 GB soldered-on RAM.

#### USB

Up to four USB ports support keyboard, mouse, and other devices.

#### CON

Four on-board serial ports.

#### **Hard Drive**

IDE interface with support for two devices.

#### **Flash Memory**

CompactFlash® socket or eUSB interface for plug-in flash storage.

#### **Industrial Temperature**

-40° to +85°C operation for harsh environments.

#### **Fanless**

No moving parts required for CPU cooling.

#### MIL-STD-202G

Qualified for high shock/vibration environments.

#### **SPX Expansion**

Add low cost analog, digital, or CANbus modules.

## **Overview**

The Newt is an economical single board computer (SBC) featuring extensive I/O capabilities, very low power consumption, and fanless operation over the full industrial temperature (- $40^{\circ}$  to + $85^{\circ}$ C) range. The Newt takes advantage of DMP's Vortex86DX System on Chip (SoC) for 800 MHz performance with only 3.6W typical power draw. Based on the industry-standard EPIC form factor (4.5 x 6.5 inches), this SBC is an excellent solution for industrial and medical applications with substantial I/O requirements.

The Newt is designed for headless applications (no video output), or it may be used with add-on video expansion modules.

Like all VersaLogic products, the Newt is designed to support OEM applications where high reliability and long-term availability are required. From application design-in support, to its 5+ year production life guarantee, the Newt provides a durable embedded computer solution with an excellent cost of ownership. The Newt is manufactured to IPC-A-610 Class 2 standards and is fully RoHS compliant.

## **Details**

Driven by a DMP Vortex86DX System on Chip (SoC), the Newt provides 800 MHz performance. The 32-bit CPU integrates memory and I/O controller hub functions to provide an x86-compatible single-chip solution with very low power consumption.

Basic on-board features include single or dual Ethernet with network boot capability, up to 1 GB soldered-on DDR2 RAM, up to four USB ports, four serial ports, IDE controller with support for two devices, CompactFlash socket or eUSB interface (optional) for removable flash storage, and three general purpose timers. On-board data acquisition features include up to sixteen analog inputs, up to eight analog outputs, and thirty-two digital I/O lines. An industry-standard PC/104-Plus expansion site provides plug-in access to a wide variety of industry-standard expansion modules from numerous vendors. The SPX expansion interface provides low-cost plug-in expansion for additional analog, digital, and CANbus I/O.

Designed for full industrial temperature (-40° to +85°C) operation, the rugged Newt board meets MIL-STD-202G specifications for mechanical shock and vibration. Latching Ethernet connectors (optional) provide additional ruggedization for use in extremely harsh environments. Transient voltage suppression (TVS) devices on critical I/O ports provide enhanced electrostatic discharge (ESD) protection for the system.

## NEWT EPIC Single Board Computer

The Newt features an American Megatrends (AMI) BIOS with OEM enhancements. The field-reprogrammable BIOS supports custom defaults, remote/network booting, and other application functions. Newt is compatible with a variety of popular x86 operating systems including Windows, Windows Embedded, Linux, VxWorks, and QNX.

Product customization is available, even in low OEM quantities. Customization options include soldered-on RAM capacity (128 MB to 1 GB), CompactFlash and/or eUSB flash memory interface, standard RJ45 or latching Ethernet connectors, variable I/O capabilities (USB, A/D, D/A, DIO, Ethernet, etc.), bolt-on heat plate, conformal coating, revision locks, custom labeling, customized testing and screening, etc.

### **Ordering Information**

#### **Accessories**

Part Number	Description				
Cable Kit					
VL-CKR-NEWT	Development cable kit				
VL-CBR-2022	ATX power adapter cable				
VL-CBR-4004	Paddleboards for analog and digital I/O				
VL-CBR-4405	IDE adapter board				
VL-CBR-4406	IDE cable				
VL-CBR-5009	Primary breakout cable				
VL-HDW-105	0.6" standoff package (metric thread)				
Cables					
VL-CBL-1010	S-Video and TV Out cable				
VL-CBR-0804	12" Latching Ethernet Adapter Cable				
VL-CBR-1201	12-pin 2 mm latching / 15-pin VGA adapter				
VL-CBR-1401	Cable assembly for (2) SPX modules				
VL-CBR-1402	Cable assembly for (4) SPX modules				
VL-CBR-2010	20" 18-bit LVDS flat panel (Hirose)				
VL-CBR-2011	20" 18-bit LVDS flat panel (JAE)				
SSD					
VL-CFM-xxx	CompactFlash module (IDE)				
VL-F15-xxx	eUSB module (USB)				
Drives					
VL-CDD-xxxx	CD-RW/DVD-ROM drive (IDE)				
VL-HDD35-xxx	3.5" hard drive (IDE)				
<b>Expansion Modu</b>	lles				
EPM-VID-3	Video expansion module				
VL-SPX-x	SPX expansion module				
Development					
VL-ENCL-5C	Development enclosure				
VL-PS200-ATX	200W ATX-style development power supply				
Cooling					
VL-HDW-401	Bolt-on heat plate				
Hardware					
VL-CF-CLIP1	CompactFlash retention clip				
VL-HDW-106	0.6" standoff package (English thread)				
VL-HDW-109	eUSB hardware kit				
Miscellaneous					
VL-HDW-201	PC/104 board extraction tool				

Specifications											
General	Board Size EPIC standard: 115 mm x 165 mm (4.5" x 6.5"										
	Processor	DMP Vortex86DX SoC. 800 MHz. 256K L2 cache									
	Power Requirements	Model	Idle	Typical	Max						
	(+5V)*	VL-EPIC-17EA		3.3W	4.0W						
	2 . 5	VL-EPIC-17EB		3.8W	4.5W						
	System Reset &	Major voltage rails monitored. Watchdog timer									
	Hardware Monitors with programmable time										
	Stackable Bus	PC/104- <i>Plus</i> : PCI, ISA									
	Other I/O Expansion	VersaLogic SPX interface									
	Manufacturing Standards	IPC-A-610 Class 2 compliant									
	RoHS	(									
Environmental		-40° to +85°C									
	Storage Temperature	-40° to +85°C									
	Cooling	Standard Heatsink (fanless)									
	Airdless Deessissesses	Optional	Bolt-on heat plate								
	Airflow Requirements	Free air from -40° to +85°C									
	Thermal Shock	5°C/min. over operating temperature									
	Humidity Less than 95%, noncondensing										
	Vibration, Sinusoidal Sweep	MIL-STD-202G, Method 204, Modified Conditio 2g constant acceleration from 5 to 500 Hz, 20 minutes per axis									
	Vibration, Random	MIL-STD-202G, Method 214A, Condition A: 5.35g rms, 5 minutes per axis									
	Mechanical Shock		D-202G, Method 213B, Condition If-sine, 11 ms duration per axis								
Memory	System RAM	Standard 256 MB or 512 MB									
,		Optional 128 MB or 1 GB									
		Soldered-on DDR2 SDRAM									
Video	General	None. Use EPM-VID-3 or similar video module for development.									
Mass Storage	Hard Drive	ATA/66 IDE interface supports two devices									
_	Flash	Standard Optional	signaling)								
			eUSB (USB signaling)								
Network	Ethernet †	Standard	RJ45 connectors								
Interface		Optional Latching headers									
		Up to two autodetect 10BaseT/100BaseTX ports. On-board status LEDs and external LED header.									
	Network Boot Option	Argon Managed Boot Agent (optional with royalty									
	Network Boot Option	fee) supports PXE, RPL, NetWare, TCP/IP (DHCP, BOOTP) remote boot protocols.									
Device I/O	USB †‡	Up to four host (depending on model) USB									
		1.1/2.0 ports									
	COM 1/2 Interface †	RS-232. 16C550 compatible. 115 Kbps.									
	COM 3/4 Interface †	RS-232/422/485 selectable. 16C550 compatible. 115 Kbps.									
	Analog Input	Up to sixteen 100 Ksps. 0 to	channels. 1: c+4.096V.	. 12-bit. Single-ended.							
	Analog Output	Up to eight channels. 12-bit. Single-ended. 100 Ksps. 0 to +4.096V.									
	Digital I/O	Up to thirty-two TTL I/O lines (3.3V). Independently configurable.									
	Counter/Timers	Three general-purpose 8254 timers									
	Other	PS/2 keyboard and mouse ports									
Software	BIOS	American Megatrends (AMI) BIOS with OEM									
Sommar		enhancements									
	Operating Systems	Compatible with most x86 operating systems including Windows, Windows Embedded, Linux, VxWorks, and QNX
