Features

- 6U CompactPCI form factor
- 64-bit PCI interface
- 3.3 V/5 V selectable
- 33/66 MHz PCI clock selectable
- Hold-down bracket to secure PCI board

Introduction

The MIC-3961 is a 6U CompactPCI PCI carrier board that can hold most PCI cards in a one slot CompactPCI space. This card allows users to adapt a 32/64-bit PCI card to a CompactPCI platform through the PCI bus that has an edge connector to the host via J1/J2 connector of this carrier. The hold-down bracket secures the PCI card onto the carrier board and protects it against vibration and shock. In addition, the bracket allows any cables to be routed through the front slot panel.
