Description

The NORCO-7630 is a compact yet powerful Internet security platform that is specifically designed for secure Internet connectivity. It is suitable for SOHO (Small Office, Home Office), SMB (Small Medium Business), and ROBO (Remote Office, Branch Office) segments. Designed with the Intel® IXP42x series network processor, it offers low power consumption and high performance, meeting Internet security appliance requirements. In addition, the NORCO-7630 can support onboard system memory up to 128MB SDRAM. Designed with the Plug-and-Serve concept in mind, the 7630 offers four 10/100 Mbps auto-sensing Fast Ethernet ports in the back panel. There are LED indicators on the front panel display which monitor power status, LAN activities and LAN links. For easy access, the back panel has a RJ45, RS-232 serial port for local system management, maintenance and diagnostics. It is FCC and CE compliant.
