ARK-8155DHI

8-channel digital input and 8-channel digital output data acquisition module

Specifications and Features

Communication method: RS-485

Port: 2-line

Speed: 300bps~115.2Kbps

Communication distance: 1200m/9600bps

Isolated digital input/output channel: 8-channel input/8-channel output

Isolation voltage of isolated digital input/output: 2500VDC

Isolated digital output voltage: +5V~+40V

Isolated digital output current: 200mA(MAX)/channel

Isolation voltage of isolated digital input: 2500VDC

Isolated digital input voltage: 10V~+50V

Power supply: 10V~30V

Watchdog timer

Supports ASCII protocol and MODBUS protocol
