PSB-1715

Socket 478 Pentium® 4 CPU Card with VGA/Sound/LAN

PSB-1715 is elaborately designed. Powered by Intel® 845E chipset which support the Intel Pentium® 4 processor built with Intel's 0.13-micron technology, the Pentium® 4 processor delivers significant performance gains for use in multimedia computing, business solutions and all your processing needs. The PSB-1715 can run up to P4 2.X GHz that is the fastest CPU available on the market, bringing industrial automation to a high-speed world. Not only does the PSB-1715 support Intel® most advanced processors, it is also deployed with an effective VGA controller to enhance its function. Equipped with ATI Mobility M6 VGA chipset, the CPU card is empowered to support AGP 4x standard, which makes it an ideal engine for 3-D graphics.

While exceeding the speed limit, the PSB-1715 is also strengthened with a great memory system. Two 184pins DDR DIMM are onboard to support up to 2GB DDR SDRAM and ECC registered module as well under the control of Intel® 845E chipset. With the high-speed performance and great capacity of memory, the PSB-1715 is the most powerful CPU card than ever before.
